Summary

Full Stack Developer experienced in building real-time platforms and AI-powered SaaS applications using JavaScript, TypeScript, Java, and C#. Skilled in REST API development, scalable backend architecture, and modern frontend systems with React and Next.js. Delivered 4,000+ LOC production-grade applications featuring WebSocket synchronization, payment integrations, and cost-efficient AI workflows.

Experience

Associate Product Engineer Intern — DeltaX (Remote)

Jan 2026 – Present

- Completed structured backend training covering **C#, SQL, ASP.NET Core, and REST API development**.
- Built **2 console applications** using Service-Repository pattern with Dependency Injection and OOP.
- Designed **3 ERD models** (IMDB, Swiggy-style Ordering, Movie Booking System).
- Developed REST APIs using ASP.NET Core and integrated **Dapper ORM** to improve query performance.
- Submitted PRs regularly and incorporated mentor feedback for production-grade standards.

Projects

EvalMeet — Real-Time Technical Interview Platform

Tech Stack: Next.js, TypeScript, Convex, Stream SDK, Clerk, WebSockets

- Architected a **real-time full stack application (4,000+ LOC)** with role-based authentication and scheduling.
- Incorporated low-latency video communication (<100ms) and collaborative IDE supporting **3 languages**.
- Achieved **50–100ms code synchronization** via WebSocket architecture.
- Designed system for **dozens of concurrent sessions**; tested with 10–15 active users.
- Built live execution workflow using Piston API with optimized state updates.

Intri AI — AI-Powered Room Redesign SaaS

Tech Stack: Next.js, PostgreSQL, Replicate API, Stripe, Firebase

- Developed SaaS platform with **50+ image generations** using AI models.
- Architected credit-based billing (3 free → 20 paid credits) merged with Stripe.
- Managed secure authentication and transactional credit tracking.
- Handled AI response cycles averaging **60 seconds** with seamless UX.

AI Skill Roadmap Generator — Ongoing

Tech Stack: Next.js, PostgreSQL (Neon), Gemini API, OAuth, Polar.sh

- Engineering AI-driven roadmap platform personalized by skill level and duration.
- Implemented caching with **5 stored templates**, projecting up to **90% API cost reduction**.
- Integrated SaaS subscription workflow via Polar.sh.
- Structuring backend for future rate limiting and resume-based skill extraction.

Skills

- **Programming Languages:** JavaScript, TypeScript, Java, C#
- **Frontend:** React, Next.js, TailwindCSS, ShadCN UI, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, ASP.NET Core, REST API Development
- **Databases:** PostgreSQL (Neon), MongoDB Atlas, SQL
- **Authentication & Security:** Clerk, Passport.js, OAuth, RBAC
- **AI & Payments:** Gemini API, Replicate API, Stripe, Polar.sh
- **Tools & Platforms:** Git, GitHub, Vercel, Render, Firebase, SSMS
- **Human Languages:** Hindi (Native), English (Professional), German (Basic)

Education

B.Tech, Computer Science and Engineering

2022 – 2026

Noida Institute of Engineering and Technology, Greater Noida, U.P **GPA: 8.2/10**
